

stakeholders matter business value pdf

In a corporation, as defined in its first usage in a 1963 internal memorandum at the Stanford Research Institute, a stakeholder is a member of the "groups without whose support the organization would cease to exist". The theory was later developed and championed by R. Edward Freeman in the 1980s. Since then it has gained wide acceptance in business practice and in theorizing relating to ...

Stakeholder management is a critical component to the successful delivery of any project, programme or activity. A stakeholder is any individual, group or organization that can affect, be affected by, or perceive itself to be affected by a programme. Stakeholder management creates positive relationships with stakeholders through the appropriate management of their expectations and agreed ...

3. Prioritizing Requirements. New requirements, including defects identified as part of your user testing activities, are prioritized by your project stakeholders and added to the stack in the appropriate place. Your project stakeholders have the right to define new requirements, change their minds about existing requirements, and even reprioritize requirements as they see fit.
