115 Chapter 7 Structural design Introduction Structural design is the methodical investigation of the stability, strength and rigidity of structures. The basic objective in structural analysis and design is to produce a structure capable of resisting all applied loads without

115 - Food and Agriculture Organization of the United Nations

structure such as beams, truss and frames. 4. Differentiate between stable and unstable structure. 5. Define flexibility and stiffness coefficients. 6. Write force-displacement relations for simple structure. 1.1 Introduction Structural analysis and design is a very old art and is known to human beings since early civilizations.
