Innovation can be simply defined as a "new idea, creative thoughts, new imaginations in form of device or method". However, innovation is often also viewed as the application of better solutions that meet new requirements, unarticulated needs, or existing market needs. Such innovation takes place through the provision of more-effective products, processes, services, technologies, or business ...

1. Introduction. The World Wide Web (WWW, or simply Web) is an information space in which the items of interest, referred to as resources, are identified by global identifiers called Uniform Resource Identifiers (URI).. Examples such as the following travel scenario are used throughout this document to illustrate typical behavior of Web agentsâ€”people or software acting on this information space.

Architecture of the World Wide Web, Volume One

Alerts warn about vulnerabilities, incidents, and other security issues that pose a significant risk.
