

test run in his pdf

The mirror test – sometimes called the mark test, mirror self-recognition test (MSR), red spot technique, or rouge test – is a behavioural technique developed in 1970 by psychologist Gordon Gallup Jr. as an attempt to determine whether an animal possesses the ability of visual self-recognition. The MSR test is the traditional method for attempting to measure self-awareness.

The Nevada Peace Officers’ Standards and Training Physical

Note on human performance: The experiments on human performance, as described by [], did not control for whether subjects had prior exposure to the people pictured in the test sets. It is probable that the human subjects were familiar with the appearance of many of the identities in the test sets, since many of them are famous politicians, sports figures, and actors.

The Turing test, developed by Alan Turing in 1950, is a test of a machine's ability to exhibit intelligent behavior equivalent to, or indistinguishable from, that of a human. Turing proposed that a human evaluator would judge natural language conversations between a human and a machine designed to generate human-like responses. The evaluator would be aware that one of the two partners in ...
