to make progress in geometry in the sense that they made it abstract. They introduced the idea of considering idealized points and lines. Using Plato's words the objects of geometric knowledge are eternal. The Greek deductive method gives a kind of answer to the question how to obtain information about this idealized world.

TEXTBOOK. UNIT OBJECTIVES • Geometry is the mathematical study of space. • Euclid's postulates form the basis of the geometry we learn in high school. • Euclid's fifth postulate, also known as the parallel postulate, stood for over 2,000 years before it was shown to be unnecessary in creating a self-consistent geometry.
